Trusted Excellence Backed by Technology and Experience

Formed in 2003, Masc Solutions (Pty) Ltd combines innovation and dedicated support to provide an unrivalled level of service to blue-chip South African and International clients. The company was acquired by Stallion Integrated (Pty) Ltd in 2018.

The combination of leading-edge technology, experience and the absolute commitment to the delivery of genuine fire and security systems is the cornerstone of the company's operational philosophy.

## Our Service Offering

### | Fire Detection and Gas Suppression

We provide fire detection and suppression installation services utilising internationally approved and established products. We are proudly a SAQCC accredited and certified installer.

### | Detailed System Design

Our in-house drawing office offers comprehensive system design, installation drawings, schematic diagrams and all technical documentation.

### | Service and Maintenance

Ongoing support is provided through tailored Service Level Agreement's based on our clients' unique requirements. We Offer a 24/7 support centre manned with personnel suitably trained to provide onsite and remote support capabilities.

## Integrated Safety and Security Solutions with Long-Term Value

Through our partnership and alignment to the broader Stallion integrated offering, we are able to provide a full turnkey solution that caters to your unique requirements.

Our offering not only focuses on the safety and protection of your people and assets but also encompasses a proven return on investment strategy. Our comprehensive solution offers the design, supply, installation, commissioning and maintenance of fire detection, gas suppression and integrated security systems.

By standardising on the equipment installed throughout your sites, our integrated approach allows us to offer fixed installation and service rates. This approach also reduces the cost of maintenance, equipment availability, reduces repair times, minimizes personnel training costs and ensures all your sites remain compliant and are kept to the highest standard.
