

Mining & Energy  
Security

## | Stallion Mining and Energy Security

There are six significant security issues facing the mining sector, often inter-linked and inter-dependent. These are:

- Vulnerability to Organized Armed Attacks in Mining and Precious Metal Operations
- Challenges Posed by Community Unrest and Resulting in Operational Disruptions
- The Problem of Illegal Mining in Both Active and Abandoned Sites
- The Threat of Corruption and Crimes Related to Procurement
- The Financial Toll of Downtime Triggered by Criminal Activities
- The Risk of Product and Infrastructure Theft
- Intimidation of Employees: A Growing Concern Within the Workplace

## | Value Proposition

- Swift Response to Emergencies and Unrest
- Comprehensive Risk Management Solutions
- Unified Security Services for Total Peace of Mind
- Proactive Threat Detection and Intervention
- Advanced Emergency Evacuation Solutions
- Custom Armoured Vehicle Solutions: Rental & Z Purchase
- Trusted, Accredited Security Expertise
- Enhancing Employee Well-being and Workplace Safety
- Tactical Security Measures for Disruption Management
- Simplified Coordination: Your Single Source for Security
- Thorough Investigations: Insights and Actionable Recommendations
- Professional and Dedicated Security Personnel
- Boosting Profitability Through Minimized Downtime
- Strengthening Trust Through Security Partnerships
- Leveraging AI for Enhanced Security and Efficiency
- Committed to Community Development and Support

# | Mining Sector Security Solutions

## Specialised Solutions

- Aviation support (Drones and Helicopters)
- Underground clearing & Surface – counter illegal mining
- Cargo escorts – bullion, materials and high-risk loads
- Truth verification testing (Polygraphs)
- Armoured personnel carriers
- Reaction units
- Strike and riot control teams
- Tactical teams
- Specialised training
- Business intelligence
- Event security
- VIP security

## Investigations & Intelligence

- Truth verification testing
- Forensic investigations
- Intelligence gathering
- Crime trend analyses
- Business Intelligence
- Crim checks
- CiiMS

## Electronic Integrated Solutions

- Access control – Biometric, facial, card, time and attendance systems
- CCTV – Perimeter, offices, entry and exit points, covert cameras
- Alarms – Building and perimeter
- Distributed acoustic sensing system (Fibre as a sensor)
- Remote site monitoring in top-of-the-range control room equipped with the latest technology and analytics

## Guarding Solutions

- Physical guarding (Armed & Unarmed)
- Smelt house protection
- Plant and refinery protection
- Specialist CCTV control room operators
