Technology

Trusted. Tested. Technology-Driven.

Stallion Technology Solutions is proud to be one of Growthpoint's vetted service providers, offering world-class electronic security solutions to its tenants and clients.

| Why Choose Stallion?

We Detect. We Deter. We Defend.

Downtime from theft, vandalism, or sabotage is far more costly than the asset itself. At Stallion, our mission is to prevent these disruptions before they happen—protecting your business continuity, reputation and bottom line. Complete Security, One Provider.

| What sets us apart?

We deliver both manpower and systems under one roof—removing the need for third-party integrators or generic electrical contractors.

| Our Tier 1 24/7 Control Room offers

- Live CCTV & event-triggered monitoring
- Alarm & panic response
- IoT and AI integration
- Remote access control
- Real-time alerts and analytics
- AI-driven technology, real human response - 24/7

| Crime Prevention at Your Gate

Stallion ANPR (Automated Number Plate Recognition) with Loomix software scans every vehicle entering your site in real time. Plates are checked against national law enforcement and private security databases for:

- Stolen or missing vehicles
- Crime-linked registrations
- Known suspicious or blacklisted vehicles

Staff are alerted within seconds, enabling proactive action before threats escalate.

| Support That Stands by You

Our after-sales service is our strongest commitment, backed by a national maintenance footprint and flexible SLA options.

| Seamless Integration

Whether you're upgrading, expanding, or replacing, our platforms are designed to integrate with existing infrastructure, ensuring rapid deployment, minimal disruption, and maximum security.

Let's Talk Security. Evolve with Stallion—technology-driven security built for the modern facility environment.

-  24/7 Standby Teams
-  On-Site Technical Support
-  Remote Software Diagnostics
-  Preventative or Platinum Maintenance Packages
